

Steel expansion joint - Type SF-11

Axial expansion joint DN 15 – DN 500

Structure type SF-11

- Vacuum-proof axial expansion joint consisting of a stainless steel bellows and welded flanges

Steel bellows PN 16

- Multiple convolution bellows in various stainless steel grades
- One ply or multi-ply structure

Material grade *	Material No. as per DIN EN	Temperature**	Possible uses
Stainless steel	1.4541	-196 °C	Low temperature, acids, lyes, gases, fertilizers
	1.4404, 1.4571	up to +550 °C +550 °C	Media containing chloride, oil, soap, drinking water, food stuff, petrol

* Check or inquire about the resistance of material grades to temperature and medium.

** Check or inquire about reduction in pressure by temperature.

Flanges

Version

- Welded flanges with turned seal
- Flange drilling for through bolts

Dimensions

Standard: DN 15 - DN 500 (PN 16) according to EN 1092

Others: DIN EN, ANSI, BS etc.

Connection dimensions see technical annex

Materials

Standard: 1.0038 (S235JR),
1.0460 (P250GH)

Others: stainless steel, etc.

Corrosion protection

Standard: anti-corrosion primed

Others: special varnish, etc.

Applications

- for compensating axial movement
- for reducing tension, in pipes and their system components, e.g.
 - pumps
 - compressors
 - motors
 - turbines
 - machines
 - process plants
- for installation in
 - industrial applications
 - gas and water supply
 - exhaust systems
 - heating installations
- to compensate for installation inaccuracies

Special designs

Other sizes (DN), lengths or pressure ratings on request.

Accessories

- Internal guide sleeve
- Protective tube
- Gas sealings for DVGW-application

Certificates

- CE (DGR 97/23/EG)
- American Bureau of Shipping
- Bureau Veritas
- DVGW (DN 32 - DN 200)
- Germanischer Lloyd
- Lloyd's Register of Shipping
- RMRS

Note

Please comply with the general technical instructions regarding reaction force, moving force, fixed point load, installation instructions, etc.

Subject to technical alterations and deviations resulting from the manufacturing process.

500	420	53	535	2290	572	482	16	715	36	147.0

For larger sizes (DN) please see type SF-16. Also available with PN 10 flange connection.
 Table values refer to +20 °C, bellows material 1.4541, 1000 cycles. Max. allowable pressure pulsation of 1.6 bar (brief periods).
 Please inquire for deviating values.
 *Effective bellows cross sectional area is a theoretical value.
